Answer

***They were  
looking for  
WMDs.***

destruction (WMDs) at the end of the Persian Gulf conflict, and UN inspectors were to observe the dismantling of the WMDs. Saddam Hussein refused to allow the inspection, and the United States worried that Iraq was developing nuclear weapons and offering help to groups like al-Qaeda. As a result of this view that Iraq was a threat, the United States invaded Iraq in 2003. This invasion is often referred to as **Operation Iraqi Freedom**.

Saddam Hussein's government quickly collapsed because so many Iraqi people felt he was a cruel and unfair leader. Hussein went into hiding and was not found until 2005. After the United States captured him, he was turned over to the Iraqi people and then put on trial. He was found guilty of many crimes and was executed. However, the end of Saddam Hussein's rule did not bring peace to Iraq. The United States did not have a plan to help reorganize the country once Hussein's dictatorship was over. The country fell into civil war between Sunni and Shia Muslims, as well as ethnic groups like the Kurds.

US forces remained in Iraq trying to set up a stable government. In 2005, elections were held in Iraq for the first time in many years, but the new government was not strong or stable, and conflict continued throughout the country. In 2011, the United States withdrew its last troops from Iraq. The country remains unstable and the rise of ISIS has caused additional problems throughout the country.
